PRE-STAKED EVERGREEN GRAFTS

Our grafts are ready for field planting and cultivation when shipped—no grafts broken in shipping or cultivation—no expensive staking or tying necessary.

Before your graft is shipped from Hill's, a light but strong stake is inserted into each pot beside the graft. The rubber strip is replaced with grafting tape that encircles both the stake and the graft, and the tip of each graft is secured to the stake with a patent tie. The pot itself is then replaced with a light-weight, moisture-proof wrapping to save shipping expense and to insure that the graft reaches you in the best possible condition.
